

## Audi Money Market fund Quarterly Report –Q3-2014

### Fund's Performance

The Fund achieved annualized returns of 7.91% net of fees and tax by the end of 3Q2014, with annualized YTD performance reaching 8.44%. In comparison, the three-month deposits yields reached an average of 6.8% for the same period as Central Bank of Egypt (CBE) statistics show. The annualized returns of the Fund since its inception reached 9.09% net of fees and taxes.

### Economy & Market Outlook

Yields of money market instruments ended the quarter with an increase after witnessing much volatility throughout the period. The MPC decided to increase the corridor rate by 1% during their meeting in July in a preemptive move to counter the expected inflationary impact from the subsidy reform and the energy price increases. Moreover, the issuance of the Suez Canal investments certificates during September added temporary pressure by slightly drying up liquidity in the market, forcing yields higher. By the end of the quarter, treasury bills issues reached an average net of tax rate of 9.94%, 9.83%, 9.71% and 9.30% for the 1 year, 9 months, 6 months and 3 months respectively.

As for economic developments, the government announced the digging of a new canal waterway as part of the Suez Canal Development mega project. The new Suez Canal was financed through the issuance of 5-year debt certificates to the public. The certificates offered annual interest of 12% and the total proceeds from its sale came above the amount the government was looking to raise; reaching EGP 64 billion. The certificates issue attracted EGP27 billion of fresh cash from outside the banking system and even helped ease FX pressure, as USD1.5 billion of foreign currency deposits were exchanged into local currency to purchase the certificates. Moreover, the minister of investment disclosed that the government will announce a new investment stimulus package worth EGP64 billion to be executed over two phases in accordance with Egypt's new budget. As for net international reserves (NIR), it saw an increase to reach USD16.8 billion in August, while inflation continued to increase reaching 11.5% in August from 11% in July.

### Investment Strategy

Yields are expected on the short term to witness some stability or slight increase; therefore, the fund manager will maintain a duration between 110 to 130 days for the fund's investments, to avoid any corrections in the short term. The fund manager continues to be optimistic about the implementation of economic reforms and is expecting yields to ease on the longer term.
