

**Fund Manager's Analysis**

**Fund's Performance**

The Fund achieved annualized returns of 10.34% net of fees and tax by the end of 3Q2013. In comparison, the three-month deposits yields reached an average of 7.9% for the same period as Central Bank of Egypt (CBE) statistics show. The annualized returns of the Fund since its inception reached 9.12% net of fees and taxes.

**Economy & Market Outlook**

The money markets started the quarter with a relatively bearish sentiment, following a Fitch downgrade to Egypt on the back of the political and economical concerns. However, a number of positive developments helped regain some confidence as yields dropped significantly towards the end of the quarter. Grants and loans from GCC countries helped the government ease the FX pressure and in turn easing the pressure on the budget. More importantly, the CBE has cut interest rates by 100 bps during the quarter in order to help economic growth, which was reflected in lower yields on treasury bonds. Towards the end of the quarter, treasury bills issues reached an average net of tax rate of 8.43%, 9.19%, 8.48% and 8.76% for the 1 year, 9 months, 6 months and 3 months respectively.

On the economic front, neighboring countries have pledged more aids and grants to the country; a total of USD12 billion from UAE, Kuwait and, KSA in grants, deposits and hydrocarbon products. This helped the CBE hold an exceptionally large FX auction; USD 1.3 billion, while maintaining stability on the Net International Reserves, at USD 18.7 billion in September. GDP recorded growth of 2.2% 2Q 2013 versus 3.3 a year earlier. Meanwhile, inflation eased to 9.8% during the month of August.

**Investment Strategy**

With the current market conditions and given the recent drop in interest rates after a positive sentiment, the fund manager's strategy for the coming period will focus on maintaining maximum duration for the fund. The manager will increase trading activity to capitalize on anticipated volatility in yields.
